

Learning times tables at home is key to building strong math skills and confidence. It helps kids solve problems faster and makes more complex math easier down the road. With your support and regular practice, we can give them a solid foundation for future success. Let's work together to make math fun and rewarding! Here are some useful tips, activities, and websites to support your child's learning.

Here's a booklet full of tips and games to help your child learn at home

Bbc Bitesize - for songs, videos and quizzes

<https://www.bbc.co.uk/bitesize/articles/z97rdnb#zw6k7v4>

More songs

Jack Hartman's music channel for more times table songs. It's great for fun and catchy songs. VARNING!!!! These songs could drive you mad!

$$6 \times 3 = 18$$

Times table rockstars

<https://trockstars.com/>

Times Table Rockstars is the platform we use weekly in class to reinforce times table learning. Each child has their own login, and we recommend they spend just 10 minutes a day on the platform to strengthen their skills and confidently master their year group's times tables.

Some more times table websites to support your child's learning

Times Tables from 1x to 12x - Activities to help work through one set of times tables at a time
